

Asset Management tool

A comprehensive approach to asset life-cycle tracking

EHS Hero's Asset Management tool is a simple solution for managing asset life cycle, utilization, and cost. With this tool, you can inventory all your equipment assets, store key info, and import/export from your accounting system. This helps increase visibility and accountability in your organization and simplifies the Occupational Safety and Health Administration (OSHA) audit process.

This tool streamlines workflows by linking assets with:

- Equipment maintenance
- Corrective and preventive actions
- Industrial hygiene
- Lockout/tagout history
- Incident tracking and compliance observations

The EHS Hero® difference

- Hands-on implementation process, configurable to fit your timeline
- Interconnects with accounting and CMMS software

Streamline your asset management. Call today.
