

# A comprehensive solution to SDS management

## SDS Search, HazCom, and SDS Management

In a hazard communication survey conducted by BLR®, 53% of respondents said that obtaining and managing updated safety data sheets (SDSs) was a significant challenge.\*

If you're looking for a simple solution for SDS retrieval and management, BLR has you covered. The combined power of BLR's SDS Search and HazCom and SDS Management tools makes it easy for you to build and manage a comprehensive, compliant SDS library.

## Ensuring workplace safety and compliance

BLR's HazCom and SDS Management tool makes building your SDS library and ensuring chemical safety easy with simple uploading, automated labeling, and mobile offline access to essential information. Boost workplace safety, streamline workflows, and enhance OSHA compliance with this chemical management software solution.

### Key benefits

- Easily manage SDSs across multiple sites
- Ensure OSHA compliance for employee access to SDSs
- Adopt environmentally conscious practices

### Key features

- Create a configurable SDS library with custom search parameters
- Generic user access ensures quick access to SDSs for all employees
- Integrations with Training Management, JHA, Incident Reporting and Investigation, and CAPA tools streamline workflows
- The ability to designate SDSs as trial, active, or archive assists with record retention compliance

# Easy access to critical safety information

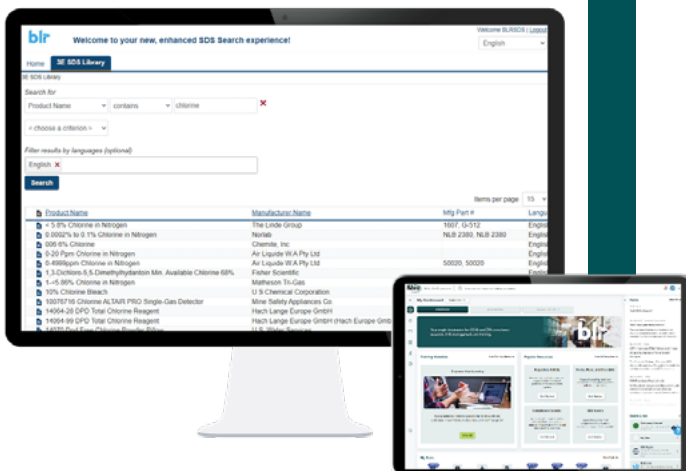

Gone are the days of endlessly trying to track down up-to-date SDSs. With BLR's SDS Search tool, you can easily search, find, and save SDSs on even the most obscure chemical products.

## Key benefits

- Save time searching for SDSs
- Improve the accuracy of your SDS library
- Easily share SDSs with employees

## Key features

- Access a comprehensive database of up-to-date SDSs
- Search by various criteria, including product name, product identifier, manufacturer, supplier, or CAS#
- Enhance visibility into chemical hazards by downloading and sharing SDSs as a PDF

**Speak with a solutions architect today to see how this powerful solution can simplify your SDS management and compliance efforts.**
