

Protect your people, property, and environment

Superior permit and hazardous work management

Managing permits and hazardous workspaces can be cumbersome without the right tools. If you're looking to automate critical tasks associated with permit and work authorization management, look no further than BLR's EHS Hero®.

Permit Management

The Permit Management tool streamlines the process of managing agency-regulated permits.

Key features

- ▶ Effortless uploading, building, and renewing of permits
- ▶ Track full permit revision history
- ▶ Intuitive document storage and retrieval
- ▶ Configurable to meet your needs

Work Authorizations

The Work Authorizations tool has the additional benefit of granting total control over the review and approval process to increase visibility of workplace hazards.

Key features

- ▶ Create, execute, and reassess hazardous work environments
- ▶ Easily build and manage work authorizations
- ▶ Track whether executions were closed normally or abnormally
- ▶ Collect signatures for review and approval

The EHS Hero difference

- ▶ Integration with the CAPA tool pools action items into a centralized hub
- ▶ Create and store an unlimited number of permits and work authorizations

Speak with a rep today to learn how EHS Hero can help you efficiently manage permits and hazardous workspaces.
